

Maintenance Approval and Safety Policy

Domain: GOVERNANCE_CONTINUITY_KNOWLEDGE | AssetBridge AI Knowledge Document

1. Human-in-the-Loop Governance Boundary

AI agents formulate recommendations, analyze cost variances, and prepare approval requests. Under no circumstance may an AI agent approve high-impact financial outlays or contractor appointments autonomously.

2. Manager & Admin Approval Mandate

All repair proposals with estimated cost exceeding 10,000 LKR or involving structural modification require formal digital authorization by the overseas property manager or verified owner.

3. Safety Compliance & Lockout/Tagout

Before work commencement, contractors must sign off on utility isolation protocols. For electrical repairs, the main breaker must be locked out, and for plumbing, the main stopcock tagged.
