

Property Continuity and Follow-up Guide

Domain: GOVERNANCE_CONTINUITY_KNOWLEDGE | AssetBridge AI Knowledge Document

1. Property Digital Twin & Continuity Ledger

Every completed maintenance job updates the permanent property asset history. The record stores before/after photographs, contractor warranty certificates, invoice receipts, and material specifications.

2. Automated Post-Maintenance Follow-Up Schedule

The platform automatically schedules continuity checks: 30-Day Check (Moisture meter re-test by representative), 60-Day Check (Tenant/caretaker satisfaction review), and 180-Day Pre-Warranty Expiration Audit.

3. Audit Logging & Non-Repudiation

All agent telemetry, tool executions, approval timestamps, and financial disbursements are written to an immutable append-only audit log with cryptographic hash verification.
