

Inspection and Quotation Evaluation Guide

Domain: MAINTENANCE_KNOWLEDGE | AssetBridge AI Knowledge Document

1. On-Site Digital Inspection Standards

Local representatives must complete standardized digital checklists: Structural integrity, moisture meter readings (<15% acceptable, >25% active leak), photographic proof of damaged sections, and preliminary root-cause assessment.

2. Line-Item Quotation Auditing

Quotations must break down: Material costs (Itemized brand, grade, and unit price), Labor hours (Standard trade hourly rates), Transport/access allowance, and Value Added Tax where applicable.

3. Budget Comparison & Variance Control

If contractor quote exceeds preliminary representative estimate by more than 15%, the AI Cost Agent flags the discrepancy and requests line-item justification prior to manager submission.

4. Warranty Terms & Guarantees

Mandatory warranty terms under AssetBridge standards: Minimum 12 months on structural waterproofing, 6 months on pressure plumbing, and 12 months on new electrical sub-circuits.
